

PATTERNED CONCRETE®

ARCHITECTURAL BROCHURE

 **PATTERNED**
CONCRETE®

DESIGN BY MOTHER NATURE

Patterned Concrete® products are the closest thing to natural stone, precision engineered to create the most stunning outdoor living spaces that you can imagine.

1972

Founded in 1972, Patterned Concrete® Industry, Ltd. is "The Original" patterned concrete brand in the stamped concrete industry. With the distinct advantage of 45 years research and development, we can confidently promise service, finishes and products second to none.

OUR NAME, OUR LEGACY, YOUR ASSURANCE.

Patterned Concrete® leads the industry to such a degree that other companies have come to use our brand name to describe their "patterned concrete" finishes. While we accept this as the Originator's legacy and take it as a compliment, we are far more interested in the innovations that keep our brand unique and only available through trained and licensed installers.

Patterned Concrete® is forever committed to the development of products that people love and that last for generations; architectural finishes and complementary products that add value and quality to any residential, commercial and municipal setting, and ultimately to people's lives.

With the Patterned Concrete® brand you have the absolute assurance of architectural concrete that works long, hard and beautifully, with complete customer satisfaction guaranteed.

WHY?

Patterned Concrete® believes that nature's beauty should be celebrated and made available to everyone, in all its forms, colors, patterns and glory.

There are customers who are so happy with their installations that they still tell us about them 20 years later. Many say they look better than the day we installed them. It is certain that our low maintenance, highly durable surfaces make perfect first impressions that last for generations.

THE PASSION BEHIND THE PRODUCT

We honestly believe that natural stone should not only be celebrated in the palaces and piazzas of this world, but in the homes of those who appreciate the full glowing spectrum of its beauty: the colors, forms, textures, shapes and patterns.

Every Patterned Concrete® installation is a work of art. Understanding the color, the texture and the style of how everything is placed are very important aspects in which each Patterned Concrete® installer takes pride. When end results are created by hand and not machinery, it is the passion of the artisan that shines through... and it is that very same passion that sets **Patterned Concrete®** apart as the Originator in aesthetic satisfaction.

THE DEDICATION TO CRAFTSMANSHIP

Patterned Concrete® leaves no stone unturned in capturing nature's beauty and reproducing it to perfection. Our proprietary tools and processes allow us to create surfaces that are the closest thing to natural stone... so natural, you won't notice the difference.

HEATED DRIVEWAYS

Adding an element of heat to your driveway or entry way creates a lifestyle that will truly be enjoyed. A Patterned Concrete® engineered heated driveway not only melts snow and ice but actually prolongs the lifespan of your investment by eliminating frost heave, snow plow and salt damage. No more getting up to shovel the snow or waiting endlessly for snow removal contractors. Enjoy your driveway even in the heaviest snow storms.

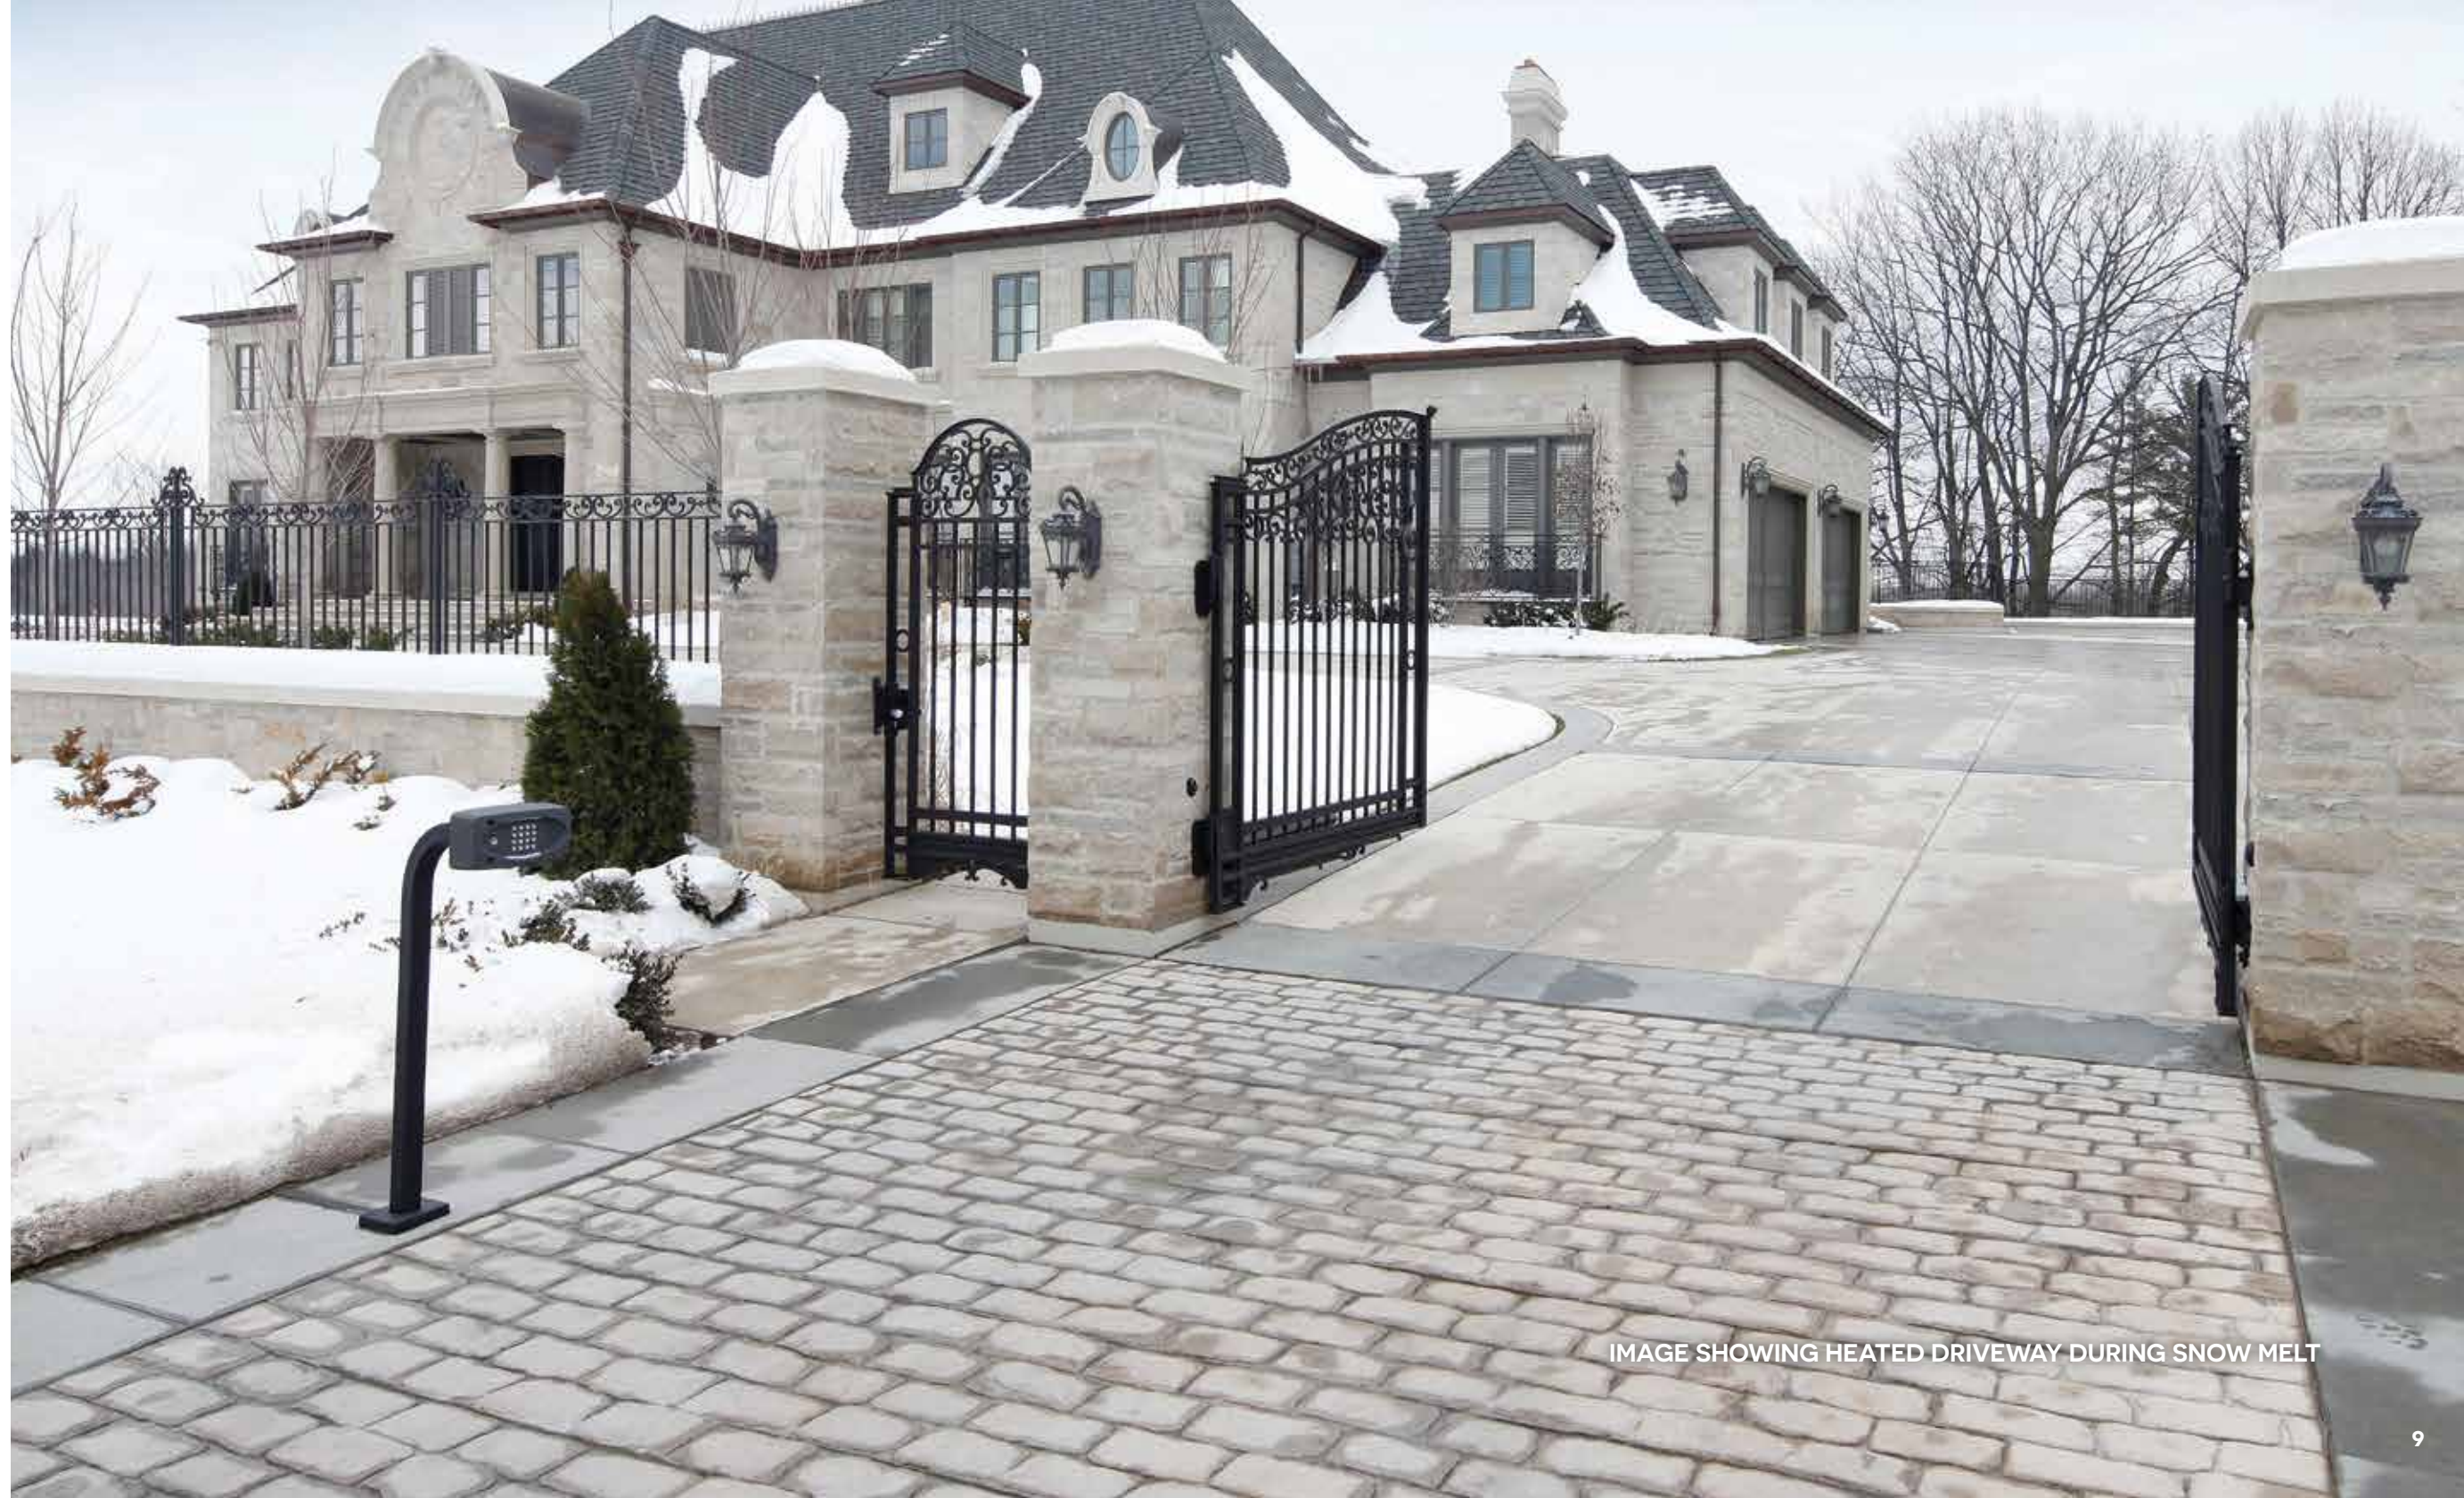

IMAGE SHOWING HEATED DRIVEWAY DURING SNOW MELT

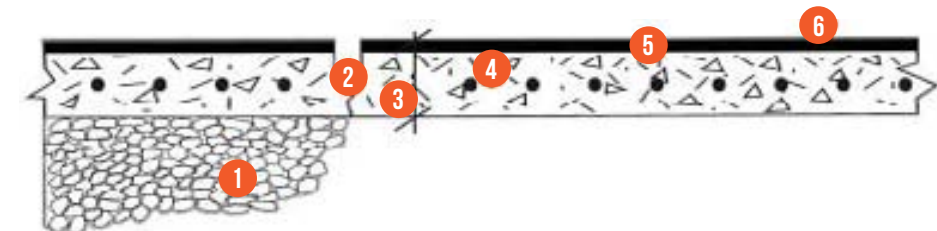

All Patterned Concrete® products are precision engineered with high density factors, meaning a much more durable outdoor space that can not only withstand the test of time, but all the wear and tear life can throw at it.

A LONG-TERM INSTALLATION

Professionally designed and installed, PCI brand tools, systems and training are only offered through **Patterned Concrete®** approved installers by territory. Each project is entered into a data base with color and pattern for future consideration of add-on or repair.

- 1 Subgrade Preparation:** Selected granular material engineered for each installation is designed into the sub grade make-up to insure drainage as well as compaction. Engineering for pedestrian surfaces and driving surfaces will vary as well as for existing soil conditions
- 2 Crack Control Expansion:** Saw cut crack control jointing installed by early entry SOFF-CUTT technology as well as predetermined engineered expansion joint layout
- 3 Concrete:** PCI proprietary concrete design mix strictly for use of PCI Color MATCH hardener and integrally mixed PCI brand matching Pigments
- 4 PCI Engineered Reinforcement:** Each project is carefully designed and engineered to incorporate PCI FRP NON-CORROSIVE rebar or typical BLACK STEEL rebar in grid format
- 5 PCI Color-match Surface Hardener:** Patterned Concrete® brand surface concrete hardening agent, available in color and uncolored, to increase the surface abrasion and allow years of weathering and color match
- 6 PCI Surface Liquid Protection:** Patterned Concrete® approved brand sealer is applied to protect from salts, stains and weathering. Patterned Concrete® approved sealers are available in both
 - 1) NO SHINE – NON SLIP NATURAL FINISH
 - 2) ENHANCE PATINA FINISH

AFTER ALL, IT'S ALL ABOUT STYLE

Nothing immediately sets the tone of a property as the architectural landscaping surrounding the house.

Patterned Concrete® offers three distinct series from which to create character, ambiance and the appeal you desire in a truly unique manner, for exquisite style that sets you apart.

THE ORIGINS SERIES

Inspired by the town squares of London and Brussels, the piazzas of Rome and the streets of New Orleans, the Origins Series brings the charm and romance of Europe and Colonial America right to your doorstep.

THE ARDESIA SERIES

Ardesia delivers the fabulous look of flagstone with pieces fitting together for the illusion of multiple shapes and sizes. Creative designs produce the most elegant installations imaginable.

THE QUARRY SIGNATURE SERIES

The Quarry Signature Series features the unmistakable scars and textures of rock hewn from the same ground as dimension stone, aggregate, riprap, sand, gravel and slate. It is simply and irresistibly rugged.

In different sizes and shapes.

QUARRY CUT HANDCUT STONE

This Original Patterned Concrete® creation was designed as a tool and not a pattern. The use of what we know as “chicken feet” allows the most natural and unique imprinted concrete that resembles random cut stone. Add multiple textures or interesting leaf or fossil prints in the design to truly create a one of a kind random stone finish. Enjoy in a natural non-slip finish with grouted joints around the kidney shaped pool or a meandering walk.
